

THE MATHEMATICS STUDENT

EDITED BY
M.K. SINGAL

VOL. XL A (1972)
(An Additional volume for the year 1972)

(Issued December, 1972)

PUBLISHED BY
THE INDIAN MATHEMATICAL SOCIETY

This volume of
THE MATHEMATICS STUDENT
is dedicated
to
the memory of
LATE PROF. V. RAMASWAMI AIYER
(1871—1936)
founder of the Indian Mathematical Society
on the occasion of his birth centenary

CONTENTS

J. HANUMANTHACHARI	: A generalisation of Dedekind's ψ -function	1
NAND KISHORE AND G.C. HOTTA	: A note on absolute Nörlund summability of a sequence of fourier co-efficients	5
C.L. KAUL	: A theorem relating generalized Hankel transform and a Whittakar transform	13
H.C. CHATURVEDI	: The solution of four series equations involving Jacobi polynomials	18
B.K. RAY	: On the absolute L-summability of a derived fourier series	28
A.C. VASU	: A note on an extension of Klee's ψ -function	36
R.U. VERMA	: A generalisation of integrals involving Meijer's G-function of two variables	40
F. SINGH	: Integration of certain products involving H-function and double hypergeometric function-II	47
MANILAL SHAH	: Expansion formulae for H-functions in series of trigonometrical functions with their applications	56
D.G. JOSHI	: On chain transforms	67
V.C. NAIR	: Differentiation formulae for the H-function-I	74
R.Y. DENIS	: An integral involving generalized hypergeometric function	79
R.Y. DENIS	: Certain expansions of generalised hypergeometric series	82
RAMADHAR MISHRA	: Some fundamental properties of a Q-stieltjes transform	87
MANILAL SHAH	: Expansion formula for a generalized Meijer function in series of Jacobi polynomials	97

A.H. SIDDIQI	: A note on Hardy's theorem for the arithmetic means of fourier co-efficients	111
REKHA PANDA	: Some special properties of generalized polynomials $A_n(x)$	114
M.A. SIMARI	: Definite integrals involving generalised E-functions	119
MANILAL SHAH	: On some problems leading to certain results involving generalized Meijer functions of two variables and associated Legendre functions	124
ARUNA SRIVASTAVA	: On finite integral involving products of n -Bessel functions	134
P.C. MUNOT AND R.K. SAXENA	: An operational formula for Jacobi polynomials	139
G.K. DUBE AND C.K. SHARMA	: On fourier series for generalized Fox H-functions	147
MANILAL SHAH	: On generalized Meijer's G-functions of two variables and generalized Legendre's associated functions	157
R. U. VERMA	: Some theorems on fractional integration and a generalized Hankel transform of two variables	169
H. N. NIGAM	: Integrals involving Meijer's G-functions and integral function of two complex variables-II	179
CHARANJIT LAL	: Double integral representation of Kampé de Fériét function	186
O. SHANKER	: General integral involving Kampé Fériét function	193
R. P. SINGAL	: Transformations of double hypergeometric functions	200
S. L. SONI	: An integral involving the product of H-functions	203
H. C. CHATURVEDI	: An elementary solution of dual series equations involving Laguerre polynomials	208

C. S. VENKATARAMAN	: An extension of Ramanujan's sum	211
AND		
R. SIVARAMAKRISHNAN		
MAYA LAHIRI	: Expansions of certain functions in a series of generalised Hermite polynomials	217
A. K. BAGCHI	: Short note on Barne's G-function and Gauss's multiplication theorem on γ -function	222
K. A. NARAYANAN	: On an application of proximate orders	225
ASHA RANI SINGAL	: Some new separation axioms in topological ordered spaces	
AND		
SHASHI PRABHA ARYA		231
C. K. SHARMA AND P. M. GUPTA	: On certain transformation formulae and Fox's H-function of two variables-II	239
MIRA BHARGAVA AND H. KAUFFMAN	: Rational solutions of the Riccati equation	253
B. K. JOSHI	: Flow of a radiating gas past thin wedge	257
S. K. NAHAR	: A note on transformation relations for the solution of general complex Riccati differential equation	266
R. U. VERMA	: On some properties of generalised Hankel Transform III	268
A.K. BAHAL AND R.N. PANDEY	: Properties and expansions of the generalised polynomial $C_n(x, y)$	275
S.L. GUPTA	: An inversion theorem involving determinants	283
P.R.P. RAO	: An orderly linear differential equation of the second order	287
V.V.L.N. RAO	: A property of self-reciprocal functions	289
F. SINGH	: On some results associated with a generalised Meijer function	291
D.P. GOYAL	: A note on the integral equation with a Cauchy Kernel	297
V.V.L.N. RAO	: A property of self-reciprocal functions	301

(iv)

- | | | |
|-------------------------|---|-----|
| MINAKETAN DAS | : The number of real zeros of a class of random trigonometric polynomials | 308 |
| Y.B. REDDY | : A note on linear differential equations | 311 |
| K.C. RAY AND | : On restricted measurability in lattice | 321 |
| B.K. LAHIRI | | |
| R.P. SINGAL | : Transformation formulae for the modified Kampé de Fériet function | 327 |
| BABBAN PRASAD
MISHRA | : The summability (A_λ) of the fourier series and the first differentiated fourier series | 331 |
| B.L. GUPTA | : A note on Goddard theory | 338 |
| M. K. NAYAK | : On the absolute Riesz summability of some series associated with a fourier series and its allied series | 343 |
