ISSUED APRIL, 1985

CONTENTS

Abstract of papers	1
S.C. Agrawal. See J. Saini and S.C. Agrawal.	339
M.A. Ansari. See Ram Babu and M.A. Ansari.	298
P.D. Ariel. See B.M. Sharma and P.D. Ariel.	157
S. Barve. See P. Chandra and S. Barve.	215
P. Chandra and S. Barve. On the absolute equivalence of T-matrices for a sequence space	215
G.N. Chandwani. On a polynomial of the form F_4	252
S. Chhatait. See K.K. Mondal and S. Chhatait	279
V.N. Dasare. See G.R. Shendge and V.N. Dasare	210
M. Davies. Newton-Raphson in reverse	149
N.V. Deshpande and V.S. Ranadive. A Square of a Connected bridgeless Dt-Graphs is 1-Hamiltonian	317
Shalom Feigelstock. On distributively generated near rings	141
G.L. Garg. Extending uniformly continuous functions	197
Gary Walls. Maximal subgroups with trivial intersections	139
B.L. Gupta and R.S. Sharma. On the absolute convergence of Fourier Transform	151
M.A. Hussain, A.N. Srivastava and S.N. Singh. Bilateral genera- ting functions for a new class of generalized polynomials	268
S.C. Jena and N.N. Swamy. Absolute summability of the conju- gate series of a Fourier series	352
N. Kishore and S. Rath. A note on the absolute matrix sum- mability of a Fourier Series	83
Kokila Sundaram. The n-dimensional distributional generalized Laplace transform	257
P.S. Koranne. See A.K. Tiwari and P.S. Koranne	193
N. Krishnoswamy. Evaluation of elliptic integrals a new technique	289
V.N. Kulkarni. See V.K. Kumbi and V.N. Kulkarni	325
V.K. Kumbi and V.N. Kulkarni. On the radius of univalence and starlikeness for certain analytic functions	325
P.C. Mahapatra and Prativa Devi. Absolute inclusion relation on Riesz Summability	389

Sahib Ram Mandan. Hesse's theorem in n -space	132
Sahib Ram Mandan and Arun Sanyal. An extension of Hesse's theorem in an n -space P_n	135
G.C. Mohanty. Approximate Euclidean angle trisection	240
K.K. Mondal and S. Chhatait. Hall effects on laminar dispersion in combined free and forced convection hydromagnetic flow through a channel	279
L. Nagamuni Reddy. See K. Sitaram and L. Nagamuni Reddy	98
S. Nanda. An unphysical metric for the weakened field equations of general relativity	273
D.A. Patil. See N.K. Thakare and D.A. Patil	222
T.R. Prabhakar and R.C. Tomar. Some generating functions for the biorthogonal polynomials suggested by the Legendre polynomials	334
K.M. Pradhan. Rodrigues formulae for the generalized hypergeometric polynomials	238
G. Purdy, R. and A. Terras and H. Williams. Graphing L-functions of Kronecker Symbols in the real part of the critical Strip	100
Ram Babu and M.A. Ansari. Some properties of magneto gas dynamic flows	298
N. Ranadive. See N.V. Deshpande and N. Ranadive	317
S. Rath. See N. Kishore and S. Rath	83
S.S. Rautela. On the absolute summability by logarithmic means of the ultra spherical series	310
B. Rzepecki. Some remarks on transformation in metric spaces	397
Jagdish Saini and S.C. Agrawal. Thermal instability of viscous Couette flow	339
G. Sankaranarayanan. On the theory of random polynomials	172
Arun Sanyal. See Sahib Ram Mandan and Arun Sanyal	135
S.M. Sarangi and B.A. Uralegaddi. The radius of univalence of certain analytic functions with negative coefficients	305
R.S. Sharma. See B.L. Gupta and R.S. Sharma	151
B.L. Sharma and P.D. Ariel. Rayleigh Taylor instability of a viscous incompressible rotating fluid	157

G.R. Shendge and V.N. Dasare. A note on functional differential inequalities	210
K. Sitaram and L. Nagamuni Reddy. Linearity in a Hall planar ternary ring	98
R.S. Sidhu. On the limit of a special continued fraction	329
S.N. Singh. See M.A. Hussain, A.N. Srivatsava and S.N. Singh	268
A.N. Srivatsava. See M.A. Hussain, A.N. Srivatsava and S.N. Singh	268
Tapasendra Basu. Some results on mappings of a metric space	320
R. and A. Terras. See G. Purdy, R. and A. Terras and H. Williams	100
N.K. Thakare and D.A. Patil. Certain bounded p -symmetric λ -Spiral functions	229
L.B. Thakur. On Stochastic integro differential equations in a Banach Space	370
Tikam Singh. On degree of approximation of linear polynomial operators	222
Tikam Singh. A note on degree of approximation by linear operators	226
A.K. Tiwari and P.S. Koranne. The delta distribution and the change of variable	193
J.P.J. Titus. On Certain subspaces of Γ	361
R.C. Tomar. See T.R. Prabhakar and R.C. Tomar	334
B.A. Uralegaddi. See S.M. Sarangi and B.A. Uralegaddi	305
H. Williams et al. See G. Purdy, R. and A. Terras and H. Williams	100
Saryoo Prasad Yadav. Convergence and absolute Cesaro summability of Jacobi series	245
