## CONTENTS

Abstract of papers	1—86
Class Room Notes :	
Prem N. Bajaj	110
Shalom Feigelstock	109
A. Venugopalan	112
Survey Article :	
V. Krishnamurthy. Schur functions in Combinatorics	207
Research Articles :	
B.D. Agrawal, Jagadamba Prasad and K. Alpna Bhatnagar. Certain Theorems on Trilateral generating relations.	113
Gopi Ahuja. (See A.N. Mehra)	170
Ashok Kumar and D.S. Hooda. The mean and variance of a MLE of generalized 'Useful' information.	263
B. Basu and K.K. Mandal. Shape of the Surface of MHD flow between two rotating cylinders.	116
D.S. Bassan. (See B.M. Munshi)	239
Alpna Bhatnagar. (See B.D. Agrawal and Jagadamba Prasad).	113
Dalip Kumar Das. Motion of a Viscous Liquid due to Surface Loads.	191
M.J. Deleon. The congruence equation $X^m \equiv a \pmod{m}$	123
K.S. Harinath. Surface displacements over a thermo diffusive half space.	255
D.S. Hooda. (See Ashok Kumar)	263
Jagadamba Prasad. (See B.D. Agrawal and Alpna Bhatnagar)	113
O.P. Juneja and G.S. Srivastava. A note on entire Dirichlet series of perfectly regular growth	270
Nirmala B. Limaya. A Generalization of Fano's postulate	126
K.K. Mandal. (See B. Basu)	116
P.L. Manley. Automorphism of central simple Algebras	236
Raj K. Markanda. On the Number of remainders in Euclidean Domains	147
A.N. Mehra and Gopi Ahuja. A formal solution of dual integral equations using $I$ and $L^{-1}$ operators.	170

Gobind P. Mehta. Restricted subset selection for non-parametric families. 184

U.K. Misra. (See Nand Kishore) 180

B.M. Munshi and D.S. Bassan. Almost Semi-continuous mappings 239

Nand Kishore and U.K. Misra. Absolute Norlund Summability on a Fourier Series 130

A. Nautiyal. (See S.R.H. Rizvi). 281

R. Parthasarathy. The growth of entire and meromorphic functions of non-integral orders 291

P.V. Ramana Murthy. On a theorem of Product Spaces 125

S.R.H. Rizvi and Nautiyal. On the approximation and interpolation of an analytic function. 281

Rohtash Kumar. Completion of locally convex space and different duals. 271

Arbindi Satyanarayana Rao. On the successive Integrarion of Stepanov almost periodic functions 151

Arbindi Satyanarayana Rao. On the order of magnitude of the matrix transform of a class of derived Fourier series (II) 151

R. Sivaramakrishnan. Certain identities involving Dirichlet Series 161

Kenneth W. Spackman. When is the Galois group of  $X^n - a$  Dihedral ? 171

A.N. Srivastava. Some generating relations connected with a class of Generalized Hermite Polynomials 241

G.S. Srivastava. (See P. Juneja) 212

A.K. Tiwari. On a distributional generalized Laplace Transform 212

V.K. Krishnan. A converse theorem for the infinite summability of sequences 103-1

S.P. Mohanty. On cyclic difference of pairs of integers 96-1

K. Ramachandra. Viggo Braun (13-10-1985—15-8-1978) 87-3

ABSTRACTS  
AT THE  
INDIAN

1. Periodic motion in the plane  
Madurai.

Let  $G$  be a finite group  
finite dimensional  $X$ -space  
exact sequence  
 $0 \rightarrow V \rightarrow P \rightarrow X \rightarrow 0$   
where each  $P_i$  is a projective

It is known that the  
algebraic closure of  $\mathbb{C}$  is

We prove in this paper  
which is a generalization of

"Let  $G$  be the Galois group  
algebraic closure of a field  
whose dimension is  $n$ "

2. On  $N$ -projective modules

In this note we study  
envelopes of non-finitely  
existence and non-existence  
Existence of  $N$ -projective

3. Generalized  $N$ -projective modules

All rings considered in this  
modules are assumed to be  
to be a minimum number  
in  $N$ , there exists a  
cation module

#### Survey Article :

- P. R. Masani. The place of multiplicative integration in modern analysis. 1

#### Research Articles :

- S.C. Arora and Ramesh Kumar, A note on tensor products, joint numerical range and joint spectral sets 152
- M.K. Agrawal (See J.C. Parnami) 75
- Mohd. Ashraf (See M.A. Quadri) 264
- P.S. Beniwal and S. Saran. Two variable analogue of centralized Lagurre polynomials. 54
- Badri Prasad (See V.V. Menon) 40
- Jacob Burbea and C.R. Rao. Some inequalities between hyperbolic functions. 90
- Khristo N. Boyadzhiev. An inequality for bounds of successive derivatives 214
- G.G. Bastos. Quasi-semi-valuations and Groups of Divisible 257
- R.N. Bala (See S.N. Singh) 250
- Edward L. Cohen. On Diophantine Equations of the form  $X^2 - Dy^2 = 2Z^2$  106
- Elias David. Power sets as complete Boolean Algebras 254
- Remy Y. Denis. On certain generating functions for basic hypergeometric polynomials 245
- K.K. Dewan. On the location of zeros of polynomials. 170
- J.S. Gupta. On the space of entire Dirichlet series. 219
- L.C. Gupta. Some generating functions for Jacobi Polynomials. 164
- L.C. Gupta. Integral representation and transformation of certain hypergeometric functions of higher order in two variables. 184
- C.B. Gupta and S.P. Gupta. Unsteady flow of a dusty viscous fluid through a uniform pipe having a circular cross section. 239
- S.P. Gupta (See C.B. Gupta) 239

G.C. Hotta and T.C. Padhi. A note on $ \bar{N}, p_n $ summability of an associated conjugate series of a Fourier Series.	95
M.A. Hussain and S.N. Singh. Operational derivation of generating relations for a class of generalised Legendre Polynomials.	61
S.C. Jena. (See U.K. Mohapatra)	206
S.R. Joshi. (See G.R. Shendge).	146
M.A. Khan (See M.A. quadri)	264
S.A. Katre and A.R. Rajwade. On the Jacobsthal sum $\phi_4(a)$ and related sum $\phi_8(a)$ .	194
Charanjit Lal. On the sum and reducible case of a certain Appell's function.	268
V.V. Menon and Badri Prasad. Estimate of empty cell probabilities in classical occupancy problem.	40
U.K. Mohapatra, S.C. Jena and Padmini Padhi. A note on local property of absolute matrix summability of a fourier series.	206
K.A. Narayanan and R. Partha Sarathy. Exceptional values of meromorphic functions	64
R. Pathasarathy. (See K.A. Narayanan)	64
J.C. Parnami, M.K. Agrawal and A.R. Rajwade. Triangles and cyclic quadrilaterals.	79
T.C. Padhi (See G.C. Hotta)	95
Padmini Padhi (See U.K. Mohapatra)	206
A.B. Patel. Joint spectrum of subnormal operators	124
T.R. Prabhakar and Reva. An Appell sequence of a general nature	116
Jagdamba Prasad. Bilateral and trilateral generating relations for a unified polynomial set $R_n(x)$ .	201
K.C. Prasad. A note on asymmetric approximations	176
K. Qureshi. Error bounds in the approximation of functions.	101
M.A. Quadri. A Commutativity Theorem for semi-Prime rings.	264
C.R. Rao (See Jacob Burbea)	90
A.R. Rajwade (See S.A. Katre)	194
A.R. Rajwade (See J.C. Parnami)	75
S.R.H. Rizvi. Interpolation series and approximation of entire functions	46

S. Saran (See P.S. Beniwal)	54
C.K. Sharma and V.S. Shukla. On the multiple hypergeometric functions and $H$ -function of several complex variables.	212
G.R. Shendge. On functional integral inequalities.	146
U. Shukla. Interpretation of $\text{Ext}^1(C,A)$ .	129
V.S. Shukla. (See C.K. Sharma)	212
Anand Prakash Singh. A note on right factor of an entire function.	181
S.N. Singh. (See M.A. Hussain)	61
Anand Prakash Singh. A note on exceptional value Picard for simple and double zeros.	272
S.N. Singh and R.N. Bala. Some generating functions for the product of two generalized Hermite polynomials.	250
M.B. Singh and B.M.L. Srivastava. On some results involving the products of Horn's function and Kampé de Fériet function	231
B.M.L. Srivastava. (See M.B. Singh)	231
W.T. Sulaiman. On absolute Norlund summability of Laplace series	111
J. Thangamani. On a certain class of functions analytic in the Unit Disc.	137
J.K. Thukral. On left Weyl's theorem.	227
Mihai Turinici. A differential lipschitzianness test on convex metric spaces.	152
<b>Class Room Notes.</b>	
Maurice Craig. What are quaternions ?	289
William Dunham. An application of Baire Category.	296
P. Jothilingam. A problem in undergraduate Mathematics.	284
Gretchen Carey Roy and Ranjan Roy. The product of $r$ consecutive positive integers is divisible by $r$	299
Kesiraju Satyanarayan. The Tetrahedron the Fee of whose altitudes are coplanar.	275
Kesiraju Satyanarayana. Some Centres of A Scalene Triangle.	293
U. Shukla. On Cyclic Groups.	282
<b>Book Review.</b>	
Elements of Functionai Analysis by B.K. Lahiri.	300
