

**THE JOURNAL  
OF THE  
INDIAN MATHEMATICAL SOCIETY**

ISSN (Print): 0019-5839  
ISSN (Online): 2455-6475

NEW SERIES

VOL 89, NOS. 3-4  
JULY–DECEMBER 2022  
(PUBLISHED IN JULY 2022)

Editor-in-Chief  
PEEYUSH CHANDRA

The Journal of the Indian Mathematical Society pays homage to its  
Former Editor-in-Chief Professor Satya Deo, who passed away on  
June 19, 2022.

Published by the Society

Co-Published Online by Informatics Publishing Limited, Bangalore  
“Online issues are available at <http://informaticsjournals.com/index.php/jims>”

### **Paper Submission:**

Papers intended for publication should be submitted online in a .pdf file to the email: jimsmorane@gmail.com

However, the final version of the accepted paper should be submitted both in .pdf and in L<sup>A</sup>T<sub>E</sub>X.

Manuscripts (including bibliographies, tables, etc.) should be typed double spaced in L<sup>A</sup>T<sub>E</sub>X. Sections should appear in the following order. Title page, Abstract, Keywords and Phrases, Mathematics Subject Classification, Text, Notes and References. While typing in L<sup>A</sup>T<sub>E</sub>X, the following Preamble be used:

```
\documentclass[10pt, a4]{amsart}
\usepackage{amsfonts, amssymb, amscd, amsmath, enumerate, verbatim}
\renewcommand{\baselinestretch}{1.2}
\textwidth = 12 cm
\textheight = 19.5 cm
\topmargin = 0.5 cm
\oddsidemargin = 1.5 cm
\evensidemargin = 1.5 cm
\pagestyle{plain}
```

For more details, refer to the IMS website <http://www.indianmathsociety.org.in>

There are no page charges. Authors of the papers printed in the Journal will be supplied a pdf file of their paper.

Copyright of the published articles lies with the Indian Mathematical Society.

In case of any query, the Editor may be contacted.

This volume or any part thereof may not be reproduced in any form without the written permission of the publisher.

This volume is not to be sold outside the country to which it is consigned by the Indian Mathematical Society.

**CONTENTS**

1.	A. Aghili	Mehler-Fock, Legendre integral transforms with applications	199–213
2.	Murat Altunbaş	A note on $f$ -biharmonic curves in Lorentzian Heisenberg and Lorentzian $Sol_3$ spaces	215–225
3.	Saniya Batra and Prakriti Rai	A generalization of a class of Humbert–Hermite polynomials	227–236
4.	Namita Behera	Fiedler linearizations for higher order state-space systems	237–261
5.	Mansour Belarbi, Hichem Elhendi and Lakehal Belarbi	Biharmonic curves in three-dimensional generalized symmetric spaces	263–277
6.	Th. Rojita Chanu, St. Timothy Kom and O. Ratnabala Devi	Cyclic and constacyclic codes over $\mathbb{F}_2[u, v]/\langle u^2, v^3 - v, uv, vu \rangle$	279–291
7.	Saral Datta, Sugata Gangopadhyay and S. K. Datta	Gowers $U_3$ norm of cubic MMF bent-negabent functions constructed by using Feistel functions	293–303
8.	Neha Gupta and J. P. Jaiswal	Ball Convergence of modified Homeier-like method in Banach spaces under weak continuity condition	305–316
9.	Vu Nhat Huy and Nguyen Ngoc Huy	Landau-Kolmogorov and Gagliardo-Nirenberg inequalities for differential operators in Lorentz spaces	317–332
10.	Santanu Koley	Convergence analysis of Havelock-type eigenfunction expansions for hydroelastic problems in water having infinite depth	333–340
11.	Naveen Mehra and V. P. Pande	Infinite order of growth of solutions of second order linear differential equations	341–351
12.	M. S. Mahadeva Naika and Harishkumar T.	Congruences for overpartition pairs with restricted odd differences	353–371

- |     |   |   |         |
|-----|---|---|---------|
| 13. | B. P. Padhy,<br>A. Mishra<br>and S. Nanda | Approximation of Fourier series of<br>functions in Besov Space by Borel<br>means                | 373–384 |
| 14. | S. Prakash<br>and M. Subbiah              | Eigenvalue bounds in an Azimuthal<br>instability problem of inviscid<br>swirling flows          | 385–403 |
| 15. | N. Sikender<br>and S. Rakmaiah            | Oscillation result for nonlinear<br>fourth-order homogeneous neutral<br>delay dynamic equations | 405–415 |
| 16. | M. R. Heidari Tavani<br>and A. Nazari     | Multiple periodic solutions for a class<br>of $p$ -Hamiltonian systems                          | 417–427 |
| 17. | R. B. Yadav<br>and S. V. Kuppum           | Conformal Riemannian morphisms<br>between Riemannian manifolds                                  | 429–443 |
